

CIT401 COURSE GUIDE

I.

NATIONAL OPEN UNIVERSITY OF NIGERIA

FACULTY OF SCIENCES
DEPARTMENT OF COMPUTER SCIENCE

COURSE CODE: CIT401

COURSE TITLE: ORGANIZATION OF PROGRAMMING LANGUAGES

II.

National Open University of Nigeria
University Village, Plot 91
Jabi Cadastral Zone
Nnamdi Azikiwe Expressway
Jabi, Abuja

Lagos Office
14/16 Ahmadu Bello Way
Victoria Island, Lagos
Departmental email: computersciencedepartment@noun.edu.ng
NOUN e-mail: centralinfo@noun.edu.ng
URL: www.nou.edu.ng
First Printed 2022

ISBN: 978-058-557-5

All Rights Reserved

Printed by: NOUN PRESS
January 2022

III.

CIT401
ORGANIZATION OF PROGRAMMING LANGUAGES (PL)
Course Team:
Developer/Writer: Dr. Afolakemi Simbo OGUNBANWO
Content Editor: Prof. Julius Olatunji OKESOLA
Dr. Francis B. Osang – HOD/Internal Quality Control Expert

III.

Table of Contents	
Introduction:	xi
Course Justification:	xi
Course Objectives:	xi
Course Aims	xii
Working through this Course	xii
Course Materials	xii
Study Units	xii
Textbooks and References	xiii
Assignments File	xiv
Presentation Schedule	xiv
Assessment	xiv
Tutor-Marked Assignment	xv
Examination and Grading	xv
Course Marking Scheme	xvi
How to Get the Best from this Course	xvi
Summary	xviii
Module 1: Concept of Programming Language	1
Unit 1 Introduction to Programming Language	3
1 Introduction	3
2 Intended Learning Outcomes (ILOs)	3
3 Main Content	3
3.1 Introduction to Programming language	3
3.2 Classification of Programming language	4
3.2.1 Machine Language:	4
3.2.2 Assembly language:	4
3.2.3 High level language	4
3.3 Attribute of good Programming Language	4
3.3.1 Clarity, Simplicity and Unity:	4
3.3.2 Orthogonality:	5
3.3.3 Support for Abstraction:	5
3.3.4 Programming Environment:	5
3.3.5 Ease of program verification/Reusability:	5

IV.

3.3.6 Portability of programs:	5
3.4 Program performance and features of programming languages	5
4 Self-Assessment Exercises	6
5 Answer to Self-Assessment Exercises	6
6 Conclusion	7
7 Summary	7
Unit 2 Programming Language Evolution and Paradigms	8
1 Introduction	9
2 Intended Learning Outcomes (ILOs)	9

3 Main Content	9
3.1 Programming Language Evolution	9
3.1.1 1883: The Beginning ...!!	9
3.1.2 1949: Assembly Language	9
3.1.3 1954 - : FORTRAN	9
3.1.4 1958: ALGOL	10
3.1.5 1959: COBOL	10
3.1.6 1964: BASIC	10
3.1.7 1970: Pascal	10
3.1.8 1972: C	11
3.1.9 Other Programming Languages	11
3.2 Programming Language Paradigm	12
3.2.1 Categories of Programming Paradigm	12
3.2.2 Overview of Main Programming Paradigm	13
4 Self-Assessment Exercises	14
5 Answer to Self-Assessment Exercises	14
6 Conclusion	15
7 Summary	15
8 References/Further Reading	15
Unit 3 Structured/Unstructured Programming Language	16
1 Introduction	17
2 Intended Learning Outcomes (ILOs)	17
3 Main Content	17
3.1 Elementary structures of structured programs?	17

V.

3.2 Difference between structured and unstructured programming languages	18
3.3 Types of structured programming	19
3.3.1 Procedural programming.	19
3.3.2 Object-oriented programming (OOP).	19
3.3.3 Model-based programming.	19
3.4 Components of structured programming	20
3.5 Advantages and Disadvantages of structured programming	20
3.5.1 Advantages of structured programming	20
3.5.2 Disadvantages of structured programming	21
4 Self-Assessment Exercises	21
5 Answer to Self-Assessment Exercises	21
6 Conclusion	21
7 Summary	22
8 References/Further Reading	22
Module 2 Language Structure	23
Unit 1 Concept of Language Structure	24
1 Introduction	25
2 Intended Learning Outcomes (ILOs)	25
3 Main Content	25

3.1 Structural Layers	25
3.1.1 Lexical structure	25
3.1.2 Syntactic structure	26
3.1.3 Contextual structure	26
3.1.4 Semantic structure	27
3.2 Error types at different levels	27
3.2.1 Lexical errors:	27
3.2.2 Syntactic errors:	28
3.2.3 Contextual errors:	28
3.2.4 Semantic errors:	28
3.2.5 Examples of contextual errors and semantic errors	28
3.3 Application of BNF Notation and Syntax Graph	30
3.3.1 BNF Notation	30
3.3.2 Syntax graph	32

VI.

4 Self-Assessment Exercises	34
5 Answer to Self-Assessment Exercises	35
6 Conclusion	36
7 Summary	36
8 References/Further Reading	36
Unit 2 Syntax	37
1 Introduction	38
2 Intended Learning Outcomes (ILOs)	38
3 Main Content	38
3.1 Syntax	38
3.2 The General Problem of Describing Syntax	39
3.2.1 Language Recognizers	40
3.2.2 Language Generators	40
3.3 Formal Methods of Describing Syntax	40
3.3.1 Backus-Naur Form and Context-Free Grammars	41
3.3.2 Extended BNF	49
3.3.3 Grammars and Recognizers	52
3.4 Attribute Grammars	52
3.4.1 Static Semantics	52
3.4.2 Basic Concepts	53
3.4.3 Attribute Grammars Defined	53
3.4.4 Intrinsic Attributes	54
3.4.5 Examples of Attribute Grammar	54
3.4.6 Evaluation	56
4 Self-Assessment Exercises	57
5 Self-Assessment Exercises	57
6 Conclusion	58
7 Summary	58
8 References/Further Reading	58

Unit 3 Semantics	59
1 Introduction	60
2 Intended Learning Outcomes (ILOs)	60
3 Main Content	60

VII.

3.1 Semantics	60
3.2 Describing the Meanings of Programs: Dynamic Semantics	60
3.3 Operational Semantics	61
3.3.1 The Basic Process	62
3.3.2 Evaluation	63
3.4 Denotational Semantics	64
3.4.1 Two Simple Examples	65
3.4.2 The State of a Program	66
3.4.3 Expressions	66
3.4.4 Assignment Statements	67
3.4.5 Logical Pretest Loops	68
3.4.6 Evaluation	68
3.5 Axiomatic Semantics	69
3.5.1 Assertions	69
3.5.2 Weakest Preconditions	70
3.5.3 Assignment Statements	71
3.5.4 Sequences	73
3.5.5 Selection	73
3.5.6 Logical Pretest Loops	74
3.5.7 Program Proofs	76
3.5.8 Evaluation	76
4 Self-Assessment Exercises	77
5 Answer to Self-Assessment Exercises	77
6 Conclusion	78
7 Summary	78
8 References/Further Reading	78
Unit 4 Lexical Analysis and Parsing	79
1 Introduction	80
2 Intended Learning Outcomes (ILOs)	80
3 Main Content	80
3.1 Lexical Analysis	80
3.2 Building Lexical Analyzer	82
3.3 The Parsing Problem	84

VIII.

3.3.1 Introduction to Parsing	84
3.3.2 Top-Down Parsers	86
3.3.3 Bottom-Up Parsers	87

3.3.4 The Complexity of Parsing	87
3.4 Recursive-Descent Parsing	88
3.4.1 The Recursive-Descent Parsing Process
